Rollercoaster ticket

September 16, 2024

```python
[4]: print("welcome to the rollercoaster")
     height= int(input("what is your height?"))
     bill = 0
     if height >= 120:
         print("you can ride the roller coaster")
         age= int(input("How old are you?"))
         if age <= 12:
             bill = 5
             print("please pay $5")
         elif age <= 18:
             bill = 7
             print("please pay $7")
         else:
             bill = 12
             print("please pay $12")
             want_pic = input("Do you want a picture? Y for yes,N for no")
             if want_pic =="Y":
                 bill += 3
             print(f"Final amount is ${bill}")
     else:
         print("Sorry,you have to grow taller")
```

```
welcome to the rollercoaster

what is your height? 120

you can ride the roller coaster

How old are you? 12

please pay $5
```
